Who we are

Alluser Industrie has been working in the Security Sector since 1968, providing security solutions to protect entrances by controlling access and authorised people.
The Bike Guardian secure system is based on the same principles of safety, reliability, ease of use and retrofit.
This solution allows for the conversion of disused spaces and is suitable in various areas such as warehouses, basements, upper floors…

Why choose the Bike Guardian?

1

2

THE BIKE GUARDIAN PORTAL

- New patented entrance for bike parking.
- Two-door system allows for only one door to be opened at a time.
- Internal sensors verify:
  - the user and bike are linked together
  - only one bike is present
  - only one person is present (optional)

THE BIKE GUARDIAN TAG

- New patented bike smart tag.
- One-time activation once attached to the bike.
- User bike tag and user access card linked.
- Deactivated when removed or sabotaged.

PREVENTS THEFT

The Bike Guardian knows which user is linked to which bike and will only allow you to leave with your own bike.

24/7 SECURE UNMANNED PARKING

At any time of the day or night, you'll find your bike exactly where you parked it. The Bike Guardian system allows transits of authorised users only.

ONLY ONE BIKE PER TRANSIT

The first door is opened by validating the user's Access Control ID. The Bike Guardian sensors verify the presence of a single bike inside the portal and only then will the second door open.

- HIGHLY RELIABLE AND INTUITIVE USE
- EASY TO INTEGRATE WITH EXISTING A.C. DATABASE
- ENCOURAGES CYCLE USE
- EASY TO RETROFIT
- INTERNAL AND EXTERNAL APPLICATIONS
- PREVENTS TAILGATING WITH OR WITHOUT A BIKE (OPTIONAL)

Park your bike safely
at any time of the day or night
