# Why choose Alluser portals?

## NO NEED FOR DEDICATED STAFF

The portal, as a caretaker/concierge, all at once recognises and permits the access to the only gym members, registering the ID. The portal can be integrated to any control access systems.

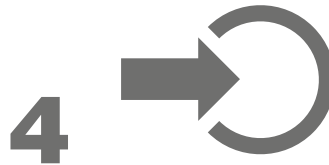

## REVENUE PROTECTION

The first door is opened by validating the member's access control ID. A volumetric sensor verifies the presence of a single user inside the pod and afterwards the second door opens, guaranteeing the access to the gym of the only members.

## HIGHER SECURITY

Keep away troublemakers. Permitting access to only authorised users significantly improves security, encouraging customers to attend the gym centre at any time of the day or night.

- HIGHLY RELIABLE
- SPACE SAVING
- SPACIOUS AND COMFORTABLE TRANSIT
- EASY TO INTEGRATE WITH ANY ACCESS CONTROL SYSTEMS
- THROUGHPUT 5-6 PEOPLE PER MINUTE

---

## WHAT'S THE POWER CONSUMPTION?

The energy bill represents a relatively critical component in the total sum of costs, especially so for a 24/7 gym facility. Alluser systems are designed to have a remarkably low-power consumption that directly contributes to lowering energy bills.

1 hour use of  = 100 hours use of Alluser system

1 hour use of  = 25 hours use of Alluser system

1 hour use of  = 5 hours use of Alluser system

# Peace of mind

for you and your customers, at any time of the day or night.
